Happenings in and Around Frank

The Sanatorium bar was opened on Tuesday morning.

H. C. Moore has taken offices in the Gouverneur block.

Mr. Lancey the chief license inspector was in town on Monday.

Rev. K. Kingston will exchange pulpits with the Methodist clergyman at Cowley on Sunday.

FOR SALE.—One Kootenay 6-hole Range with reservoir. Apply Mark Drumm, Frank. Telephone 67.

Quite a number visited the new sanatorium this week and they were all pleased with this magnificent building.

Mrs. J. W. Gresham will leave on Friday of next week for England where she will spend about eight months with friends.

A. J. Galland has resigned his position as commercial agent for the Canadian Coal Consolidated and left on Wednesday for his home in France.

E. Bernard, chief accountant at the head office of the Canadian Coal Consolidated, Limited, at Paris, has spent the past three months at Frank, left for France on Tuesday.

Medicines that aid nature are always most successful. Chamberlain's Cough Remedy acts on this principle, relieves the cough; relieves the lungs, opens the secretions and aids nature in restoring the system to a healthy condition. Sold by dealers everywhere.

LILLE NOTES

F. Anderson visited Blairmore on Sunday.

F. Wright took a trip to Lethbridge on Friday.

A. B. Hume and C. Faure visited Frank on Tuesday.

A. O-tander, the Coleman photographer, was in town on Monday.

Miss Annie Kidd, of Blairmore, has accepted a position at the Little hotel.

J. Ferri left here last week for his home in Italy. "There's no place like home."

The Italian Society of Little held a dance on Saturday evening in the Miners' hall. It was largely attended.

Dominico Desterio, who was injured in No. 1 seam of the Bear Valley mine, last week, is on the road to recovery.

M. and Mrs. J. W. May entertain a number of friends at their house on Friday evening when a most enjoyable time was spent.

A person who signs himself "A subscriber" has sent us an account of a wedding, but because he neglected to give us his name, the communication has been consigned to the W. P. B.—Ed.

Chamberlain's Stomach and Liver Tablets invariably bring relief to stomach trouble, chronic dyspepsia, headache, biliousness, dizziness, softness of the skin and dyspepsia. Sold by dealers everywhere.

Twould save us a vast many squabbles and cares
If we'd trouble our heads with
our own affairs.

J. WHEELOR

CONTRACTOR & BUILDER

Estimates given on all kinds of work.

Lumber for sale. Houses to rent.

Prompt Attention and Good Workmanship Guaranteed.

J. WHEELOR
Frank. Alta.

Sanatorium is at Frank —Town Is Forging

Ahead

We are sorry that in our last issue we referred to the sanatorium hotel as being at the east end of Blairmore. We should have stated that it was at the west end of Frank.

This hotel, which is one of the best on this continent, is situated on the south side of the railway track about half a mile west of the C. P. R. station. It has a splendid location, and we understand that it is the intention of the Canadian Coal Consolidated, Limited, who are the owners of this magnificent building, to improve the grounds around the sanatorium and make it into an ideal spot. It is near the Old Man river where fish is very plentiful and where boating may be done.

There are also many large mountains near the sanatorium which can be very easily mounted and around which there is an abundance of mountain goat, deer, bear and many other wild animals. The town of Frank is to be congratulated on having in its midst a coal company of such high standing and progressiveness as the Canadian Coal Consolidated which have erected in the town a building that would do credit to any city in Canada. This is a great boon to Frank and will be the means of giving this town considerable advertising and will make this flourishing town more important than ever.

We understand that this is but one of many great and good things which will be Frank's before the end of this year.

Coleman Notes

Mr. and Mrs. Adam Paterson were amongst the visitors in Fernie on Sunday. Mr. Paterson returned to town on Monday.

The scrubbing party, at the Coleman Miner office, is indefinitely postponed on account of the scarcity of water in the old Man river and the limited number of scrapers that are available.

Quite a number of miners here are pleased with the present agreement between themselves and the operators, which agreement expires on March 31st, and they are anxious for a renewal of said agreement without any delay and thereby avert a repetition of what took place about two years ago.

The splendid silver cup given by Thomas Frayer, the mayor of Blairmore, to the club winning the largest number of games for the season in the Crow's Nest Pass Hockey League and which was won by the local players, was presented to the Coleman club in the opera house on Saturday evening last.

Are you frequently lousy? Do you have chills or tickling in your throat? Does your cough annoy you at night, and do you raise mucus in the morning? Do you want relief? If so, take Chamberlain's Cough Remedy and you will be pleased. Sold by dealers everywhere.

Truth is the greatest at which a good many people strain, and a lie is the easiest to swallow.

Here and There

J. E. Affleck, of Lundbreck, was a visitor in Fernie on Sunday.

The C. P. R. has taken the telephone out of their depot at Fernie.

Freddy Shaw, aged 16 years, formerly in the employ of the Fernie Ledger, was killed at Coal Creek on Thursday of last week.

Rev. Herbert Booth, youngest son of General Booth, the great Salvation Army leader, spent Sunday last in Fernie and delivered three long, inspiring, interesting and instructive sermons before large and pleasing audiences.

Happenings in and Around Blairmore

Ahead

Mr. Jarret arrived in town on Monday.

A special meeting of the Board of Trade will be held on Friday.

F. W. Hogg, of Pincher Creek, came to town on Sunday last.

W. J. Bartlett and J. D. S. Barrett spent Sunday at Fernie.

A. Pelletier of the Pelletier Lumber Co., was in town on Wednesday.

A. J. Lessard and F. W. Hogg, of the pool room, went to Pincher Creek Monday.

F. M. Steele came up from Pincher Creek on Sunday. He returned home on Monday.

BORN.—On Friday to Rev. and Mrs. J. F. Hunter, a son. On Monday, to Mr. and Mrs. Forbes, a daughter.

Don't forget the Fresh Eggs at the CROW'S NEST FLOUR & FEED STORE. Strictly fresh at 35c per dozen.

Mrs. Henry Gebo hopes to open out her millinery parlors on April first, not the last of April as stated in our last issue.

R. W. Cole, painter, returned to Blairmore Monday, after spending a couple of months with friends at Maple Creek, Sask.

Don't forget the bazaar, concert and tea, to be given by the Presbyterian ladies in the Mercantile Hall on the 29th inst.

Mrs. Daniel Drain arrived in town last week end and is spending several weeks here with her husband visiting friends.

Pay Day Cash Special—Strictly fresh eggs 35c doz or \$1.00 a case, at the CROW'S NEST FLOUR & FEED STORE.

Rev. Herbert Booth, youngest son of General Booth of the Salvation Army, passed through Blairmore on his way east on Monday morning.

D. C. Drain went to Lethbridge on Tuesday and returned to Blairmore on Wednesday evening. He reports that Mrs. Drain, who is confined to the hospital there, is rapidly recovering.

As will be noticed elsewhere in these columns, Misses S. M. Bonner and C. Lindsay have taken over the Davenport Cafe, one door west of T. Ede's legal office. Meals will be served at all hours, and fruit and confections as well as cigars, cigarettes, tobacco, biscuits and temperate drinks will be made a specialty.

You don't sharpen your appetite by eating with a knife.

Are you frequently lousy? Do you have chills or tickling in your throat? Does your cough annoy you at night, and do you raise mucus in the morning? Do you want relief? If so, take Chamberlain's Cough Remedy and you will be pleased. Sold by dealers everywhere.

Truth is the greatest at which a good many people strain, and a lie is the easiest to swallow.

Notice

All Dog taxes must be paid at the office of W. A. Beebe, the Secretary-Treasurer of the village of Blairmore, on or before the 1st day of April, 1911. Those who fail to comply with this law will have their dogs shot.

By order of village council.
THOMAS FRAYER,
Chairman.

Blairmore,
March 16, 1911.

Home Course In Health Culture

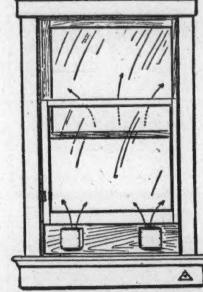

XIV.—Disease Prevention In the Home

By EUGENE L. FISK, M. D.
Copyright, 1910, by American Press Association.

WHO would not give a trifle to prevent what he could give, the boundless worlds to cure?" Dr. Young, who wrote those words, had a habit of "seeing things at night," but not in the popular sense of this expression. He wrote "Night Thoughts," but saw very clearly the principle which the medical profession is now carrying out well expressed in the homely old phrase, "A ounce of prevention is worth a pound of cure."

Sorceries of the Past.

The doctors of the past and unscientific ones that afflicted our forefathers are almost unbelievable in these days, and yet during the dark ages they were accepted as a matter

PROPER WINDOW VENTILATION.

Leave plenty of window space and so arrange your rooms that they are thoroughly ventilated and well lighted.

Of course, various methods to "see off God" or "the evil one" according to the point of view.

We do not read in the sprightly romances of Dumas and others who have thrown a glamour over history that such was the custom, nor to say general attraction to the court of France and that the great Napoleon suffered from this trouble because no one knew its cause or simple treatment. It seems difficult to realize that in those days when there was not pickpocketing from snailpox, we concupiscent in the streets of London.

The custom of sleeping in bunks in the wall, of using rushes or straw for floor covering, in the measles of which refuse scraps from the table, candle ash, etc., were allowed to accumulate, was regarded in the old days as a natural and healthful mode of existence. The custom of dipping germs infected fingers into large dishes of food containing the general supply for the family was followed by the King Edward during the middle ages, when the "black death" and other scourges spread a desolation of which it is difficult to form any conception in these days of comparative "sweetness and light."

But we must not lay too much flattering eulogy to our squalid. Taking into account the advances in science and knowledge of the causation of disease, we are today relatively just as neglectful as our forefathers. Reckless and careless habits in defiance of disease, we are still common enough and are responsible for a tremendous waste of life.

The Fall in the Death Rate.
In the registration area of the United States the death rate has fallen from 19.6 per 1,000 in 1890 to 15.4 in 1908. In Massachusetts the death rate has fallen from 19.4 in 1890 to 17.5 in 1907. In England and Wales it has fallen from 19.4 in 1890 to 14.7 in 1908; in Sweden from 17.1 in 1890 to 14.4 in 1908, and in France from 22.8 in 1890 to 14.9 in 1908.

This is a splendid showing, but when we analyze the material from which these figures are derived we find that the death rate among young people has fallen more than 30 per cent, while the death rate among the middle aged and elderly has either slightly affected or markedly increased, according to the locality investigated.

In Massachusetts the increase in the death rate at advanced ages is really startling and doubtless reflects a condition general throughout the country. We know that the decrease in the death rate among middle age and old age—tuberculosis, heart disease, Bright's disease, arteriosclerosis, etc.—have increased 105 per cent during the past thirty years. In the registration area, and an increase in the mortality at the ages affected, would naturally follow, such as is exhibited in the Massachusetts statistics.

In the limit of prevention and improvement among the infectious diseases that affect young lives has not yet been reached. These diseases, such as typhoid, cholera infantum, tuberculosis, etc., should be absolutely eradicated.

Proper sanitation, especially in the rural districts, is greatly needed and a more thorough observance of the pre-

cautionary measures against tuberculosis and other infectious maladies.

Prevention of Degenerative Diseases.

Diseases of the heart, kidneys, and lungs, and many other organs caused by high pressure living, overeating, intemperance, any condition involving undue nerve strain. What may be done to guard against these troubles? The most rational protective measure is to treat your body just as you would treat your business or your automobile. Your body is overhauled and examined periodically. What would you think of a man who put out to sea in a vessel that had been used for years and never overhauled or inspected for leaky boilers, pipes or seams? Is it not obvious that such a vessel is unsafe? But a mechanic, farmer or business man will embark on a life voyage and wait till something goes wrong before he consents to an overhauling, and then too often in his conceit and foolish egotism he derides the physician who warns him and boasts that he will overcome the doctor or the insurance company that refuses to carry his risk.

Value of Professional Examinations.

It must be apparent that thin marionettes of the past, pampered and indulged for evidence of commanding strait and impairment. Many a valuable life could be saved for years of happy and useful existence if the early symptoms of disease were detected and the manner of life changed.

Downward courses may readily be checked if the disease has not gone too far.

The wise man, therefore, will consult his doctor at least once a year and listen patiently to advice regarding the habits of eating, drinking, bathing, etc.

The individual who is the head of the whole family is also desirable. Give the children a chance to be molded and guided to health and strength instead of permitting them to grow up like weeds or untrained vines. The cornea of eye troubles, removal of appendicitis, tonsils, etc., prevent habits of bathing, toning, etc., may readily change the destiny of your children.

These principles are coming to be recognized as of such extreme importance that our latest life insurance companies have turned to us for its policyholders the privilege of free medical examinations once a year, believing that the saving of lives will more than offset the expense involved.

Care in Choice of a Home.

In choosing a habitation remember that sunlight, fresh air and dry atmosphere are the chief factors. In choosing your location you may save the interest on the mortgage in doctor's bills.

See that your home is on firm well drained ground. Made ground, however, especially packed and graded, is very likely to be dangerous to the cellar and around the foundations. Do not settle near a marshy pond or sluggish stream if you can help it. A southern exposure is desirable.

Have plenty of window space, and all windows, except those constantly occupied—bedrooms, living rooms, etc.—are thoroughly ventilated and well lighted. The best room in the house should be used by the family.

If the soil is damp the subsoil must be drained below the foundation and the cellar floors and walls thoroughly cemented. Absolute dryness may be attained by laying hollow walls. Bricks are undesirable for cellar walls, as they absorb moisture. Stone is likewise porous and retains moisture. Stair or cement coatings will obviate the danger.

Heating.

If you have a hot air furnace be sure it is of good quality, gas proof and that the air supply is drawn from outside and not from the cellar or any other part of the house. See that a water reservoir is attached to the furnace and kept filled.

If other methods of heating by direct radiation are employed some provision should be made for changing the air of the room. Many special ventilating systems have been invented.

If none of these should be installed when the house is built, a stagnant, vitiated, overbated, dusty or damp air is a menace to health. Exclude these conditions from your home. It can be done.

Water Supply.

If there is no general water supply system in your locality, savings of water will be forthcoming from any doubtful source. A deep driven well far removed from any possible source of contamination, should be secured. If possible; otherwise cistern water, held in a slate or cemented cistern, is safer. Suspected water should be tested.

I have elsewhere dwelt upon the importance of proper sewage disposal, but it cannot be too often stated that the old fashioned methods employed in the country are barbarous and unworthy of a civilized nation. Study this question carefully and adopt a system, whether surface irrigation or otherwise, that will protect your family and your neighbors from disease. If greater care is not exercised in this regard the state must step in and act vigorously to protect the community from typhoid, hookworm and other diseases due to soil pollution.

The Home Atmosphere.

It is said that Captain Adrian Jones, who has designed the four-horse chariot, weighing upwards of thirty tons, which is to be erected near Hyde Park Corner, London, as a memorial to the late King Edward VII, is a really living sculptor who understands a horse from tail-top to nostril. As a boy he loved and studied horses, and would have liked to become an artist, but he was compelled to enter the army. He saw much active service, and was then advised to become a sculptor, having devoted most of his spare time when in the army, to painting and sculpture.

Beresford's Bon Mot.

Lord Furness was the victim of an amorous bout when he was sent to York against Lord Charles Beresford. To the aid of Lord Charles came his two brothers, and the trio were cordially chafed on the number of "Charlie's" ready with his apt retort: "Yes," said we are we are Shadrach, Meshach, and Abednego, come to save you from the fiery furnace."

THE HOME ATMOSPHERE.
In the limit of prevention and improvement among the infectious diseases that affect young lives has not yet been reached. These diseases, such as typhoid, cholera infantum, tuberculosis, etc., should be absolutely eradicated.

Proper sanitation, especially in the rural districts, is greatly needed and a more thorough observance of the pre-

SOME GOOD YARNS.

Reminiscences of Admiral Montagu Concerning Royalty.

Admiral Sir Edward Montagu, Montagu, tells in his reminiscences just published, some good stories of sport at home and abroad. A sailor of the old school, he served in the Crimean War, and in the Indian Sepoy Mutiny—he has been famous in the social world as one of the most distinguished and enthusiastic members of the Royal Yacht Squadron. Admiral Montagu has the friendship of several kings, and among the best of his friends was King Edward, the present King, and the German Emperor, Wilhelm II. He is a man of many interests and more than a literary interest. It was at Cowes that he was on closest terms of friendship with these monarchs, and King Edward had been friends with him since boyhood.

He tells an amusing story of how he was commanded to dinner with Queen Victoria at Osborne, on an evening when the Queen was ill.

He was seated at the head of the table,

IMPROVEMENT IN HORSE BREEDING

HAUNTED JUNGLE.

An Explorer's Vivid Description of Dutch New Guinea.

Nearly all the states in the north west have taken a positive stand on the proposition of aiding in the improvement of the breed in the imperial colonies. It remains to be seen if the fact that these states have enacted rigid stallion registration laws, laws if enforced, will show to every stallion patron the status of the sire in question, both as to breeding and performance.

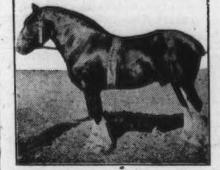

It is to be hoped that the more owner

will make the most of his opportunities and work toward constant improvement of his horse stock.

Dr. Alexander of the Wisconsin station gives the following sound advice to mare owners:

"Buy stock by mating carefully selected, sound, suitable mares with sound, prepotent, muscular, pure bred registered stallions."

Continue year after year to use the best obtainable pure bred stallions

The Clydesdale breed of draft horse is popular in Canada, where it was introduced in 1842. The reason is that it is a hardy, strong type of drafter, and it is a good one. The same is true of Scotland. The stallion shown above is of prime winning quality.

the character and breed first chosen and never outcross to any other breed.

Do not use any stallion that is sound, unsuitable, partially impotent, unlicensed or not registered in a stud book recognized by the department of agriculture.

Do not buy from any mare that is deformed, sick, diseased, vicious, unsound, unsuitable, a poor milker or a cross mother.

Breed horses with the object of steadily improving the stock on the farm and advancing the horse breeding industry of the state.

Do not retain for breeding purposes any colt that is not pure bred and eligible to registry in a stud book recognized by the department of agriculture.

Encourage the working of pure bred stallions sufficient to keep them healthy, muscular, prepotent and prevent pampering weakness, partial inbreeding and inattention to the need to tend to insure vigor, strong constitution and health in their offspring at birth and throughout life.

Encourage the horse production of the best of undesirable grade, monogram or scrotal stallions at present retarding progress in horse breeding.

Black Teeth in Hogs.

Hogs often have black teeth, but the condition does not indicate a healthy condition. As a rule, molar ulceration is found around the bases of such teeth, but where that condition exists the teeth should be extracted. It usually happens that the teeth are not discovered until the pigs become sick from internal parasites.

After dinner one day, the King invited me to dine with the Czar of Russia. I was asked to tell him about my adventures. "Well, anything," he said, "I have never been asked to dine with two Sovereigns in the same day! Do you know another dinner?"

Admiral Montagu tells several stories of King Edward's delightful kindness of heart. One day he was troubled and was troubled at the thought of this when the King invited him to dine with the Czar of Russia. I was asked to tell him about my adventures. "Well, anything," he said, "I have never been asked to dine with two Sovereigns in the same day! Do you know another dinner?"

A Rosebery Romance.

To those who love romance and the romantic, an unusual episode in the life of one of Lord Rosebery's ancestors will appeal. It occurred in 1842, when Lord Dailemyer was a young man.

The pair spent their honeymoon on the continent, and the bride becoming seriously ill, confessed that she was the wife of the rector of Thorpe, Norfolk. This was a secret, however, and she died shortly afterwards. Her husband had her body embalmed with a view to bringing it to England for burial. However, the local church officials would not have the casket in which the grim burden was packed, and it was closed by noticing this, in the kindest possible manner came to my rescue, repeated the subject to me, or answered the Emperor for me."

Alfalfa for Swine.

The stomach of swine is small, compared with those of other animals, and is not therefore adapted to unusually large quantities of coarse, bulky feeds. But it is found that alfalfa hay is relished by swine, and one-half pound a day in addition to a pound of sugar beets and a ration of grain may be fed profitably. In arid regions, where alfalfa and sugar beets are extensively grown, this ration is popular.

Dairy Wisdom.

The true value of the dairy cow is not necessarily fixed by the amount of fat there is in her milk and what it costs to produce it.

The largest milkers are the greatest eaters. This rule is one that you can tie to and follow without danger of being deceived.

The first step in the process of better breeding is to secure and use a sire that inherits from proved ancestors the prepotent power to impress dairy qualities on his offspring.

Breeding hitherto, too, young animals has been a dwarf breed.

Milk the cows clean every time if you would keep up a uniform flow of milk.

The percentage of fat in the milk of all breeds is evidently fixed and varies little, brief and individualistic.

With the year around dairying good stables are necessary, where the cows can be fed and milked in a comfortable place.

HAUNTED JUNGLE.

An Explorer's Vivid Description of Dutch New Guinea.

Details of the experiences and hardships of British and Dutch explorers in Dutch New Guinea, which for months past has been engaged in an apparently hopeless attempt to reach the great interior, now range about Mr. Goldie following the route of the explorer to sickness. Writing at the end of August from the British camp at the mouth of the Upper Amak, one of the explorers says:

"A climate, hot, steamy, and unhealthy, varying more than 25 degrees Fahr., from 64° to 90°, winter or summer. Sicknes and disease are rampant, and deaths the rule rather than the exception. Heavy rains and storms all year round, hardly a day or night passes without downpour during the so-called 'dry season.' June-September, incessant rain and day, and, in consequence, heavy floods. About a week ago Capt. Rawlinson, Dr. Marshall and I reached the Iwaka river by a 51½ mile route, which, however, only places us three miles or so east of the junction in a direction that is the worst, having yet experienced and will spend a lifetime in jungle trails and yet meet with nothing to equal it in ease. The mere fact that it is even in use makes the remaining spots of the world yet to be explored sufficient reason for presuming that the difficulties to be overcome are enormous."

It is in the jungle, never before trodden by the foot of man; to its deepest depths the natives are completely strangers; pygmies from the hills, who are afraid to leave them, the lowlanders fear it, and do not probe its dark mysteries. The outskirts and more open parts bordering the river are thickly covered with the haughty and warlike Bird of Paradise, whose shrill, joyous calls from its dancing trees enliven these dark jungles. The trees and saplings encroach upon one another, so that it is impossible for a man to stand at any spot without being surrounded by their straight stems. In addition to these are heavy undergrowth and many other obstructions, from falling and rotting trees, from the heads of dead puffer adder to the greater, to comparatively harmless python. Noxious insects abound, and feed on the leaves on the numerous mosses, ferns, trees and bushes, from the ground to the canopy. Everything decaying; no air seems to circulate there, and when little there is foetid and sticky.

Do not bring from any mare that is deformed, sick, diseased, vicious, unsound, unsuitable, a poor milker or a cross mother.

Breed horses with the object of steadily improving the stock on the farm and advancing the horse breeding industry of the state.

Do not buy from any mare that is deformed, sick, diseased, vicious, unsound, unsuitable, a poor milker or a cross mother.

Down and Out

A New Year's Story

By AGNES B. COLDWELL
Copyright, 1920, by American Press Association.

It was the last day of the year, and Marcus Eldredge had determined that its closing hour would mark the end of his earthly career.

"I'll wait until midnight and go out with the old year," he muttered as he pressed the weapon tightly against his head. As he stood there in the gaslight, his bolted door sawed slowly open, and a girl's face appeared, startled and pale as her eyes met his reflection in the glass. His glance met hers defiantly.

"Coward!" she said sharply.

"How do you know that I am?" he demanded without a trace of malice. His face showed no sign of distress except deepened lines around his eyes, his right arm was lowered and the revolver was placed on the bureau. "How do you know that I'm a coward?" he persisted.

"Because you were going to do that?" she nodded toward the weapon, and he could see that she was afraid of it. "No one but a coward would destroy himself."

"What do you know about it?" Eldredge dashed around and faced the stranger who had so unexpectedly invaded his room. "I don't know what it is to try for years to reach a certain goal and then fail? Do you know what it is to work and wait and starve and suffer privation—and then fail in the end? Then, added to the failure, do you know what it is to train the others looking for any sign of work without even a measure of success? What do you know about these things?"

"You are a coward, as I said before—the biggest craven I ever met. The girl ceded with a childlike energy.

"You don't understand," he said, a sulken look creeping into his face. "If a fellow can't get work and hasn't got a cent of money there's only one decent thing he can do, and that is to get off the earth!"

"There is no home, holds no promise for you?" she asked softly, with a note of courage in her voice.

"Not a thing!"

"There only anybody dependent upon you?" she asked.

"I have a relative or a friend in the world—nobody who cares a hang whether becomes of me!"

"I wonder if you're thought about the trouble it would make if you harmed yourself here—in this boarding house?" She took a little, and her eyes, evoking the vulnerability of the revolver, met his inquiring glance.

"I suppose you mean it would make Mrs. Jones a lot of trouble—notoriety and what not."

"I wish you were not such a coward!" she cried scornfully. "If you only had the making of a half a man in you!"

"I have the ingredients to make a successful man if I can have the chance," he retorted.

"What sort of a chance do you want?" she asked, with sudden eagerness. "What is your business?"

He hesitated an instant, and then he admitted half defitely, "I'm an artist."

"An artist!" she echoed doubtfully. "Why have you not succeeded? What do the critics say?"

"The consensus of opinion was that I'd done well, but I was not good enough to be noticed." One man said I did chairs and tables so well in my pictures of still life that I really ought to go into the furniture business. That's a sample of the knocks I've been getting."

"Do you really think about it?" she asked a low tone.

"About my own work?" he said, looking up quickly.

She nodded.

"I know it's trash—not good," he said honestly.

"Now you've made a new beginning. You can eliminate that. Why don't you go into the furniture business—design chairs and tables or sell them—or anything? You've got to start somewhere, you know," she urged.

"You don't know the disappointment I've had," he objected uneasily. "A lot of doors have closed to me, and what it has to face a blank destiny—an empty stomach."

"You haven't anybody but yourself to take care of, and I'm ashamed of you. So there!"

Marcus Eldredge looked down at the graceful form in his doorway. It was a small, slender figure, and though isolated in the midst of the great city, friendless and forsaken, seemed to have found a friend to this eager, gray-eyed girl, who, passing his doorway, had chanced to see him rehearsing his cowardly part in the little tragedy he had planned to play. New Year's eve.

"I'm ashamed of myself," he said suddenly. "I don't know what has made me so blue unless—" He bit off the words and evaded the questioning of her eyes.

"It's getting late, and I must be going. I wonder if you'd sell me that revolver! I want it for a certain purpose," she said, ignoring his confusion.

He placed the weapon in her hand without a word, but as she dropped it

into a little bag at her waist and drew out a knife, he wrenched it away.

"Please do, No. I'll get along all right. I understand why you bought the revolver and I appreciate your delicate kindness, only you must not let me act more like a cad than I have already done. I can get a job as waiter in one of the restaurants till after New Year's time. I'm going into the furniture business—going to butt right in. Wish me luck!"

"I do, most heartily," she said, happily holding out a small gloved hand for his large clasp. "I know you'll succeed, and I'll be waiting for my presentation. I'm speaking to you now, but I'll be waiting for what you have done. I opened your door by mistake for the one on the floor above. At the end of the new year I shall send for you to come to me, and if you want the revolver then you can have it."

"I shall never forget you, constable," he said, bending low over her hand, "and I shall not fail to keep any appointment you may have made me the honor to make." An instant later the door closed and she was gone.

"Joy! Think of a little slender girl, supporting herself on the railings of Marcus' room, the narrow confines of his room. Then look at a great bulking brute like me!

I make myself tired. Guess I'll look up a waiter job that very night. No time like New Year's eve in Gotham!"

Finishing his sentence, he turned, even though his cherished cause of another life work had crumbled about his ears. Marcus dug out his suit case and left it with a convenient uncle in the district, who at the same time permitted him to don a rusty suit of evasions, and he was soon on his way, into which he dodged him, a distracted head waiter, who gladly set him to work, and there was not a happier fellow in New York city that night than the hungry young man who courageously started on his new career. He worked with a will, and the next day he was promoted to more responsible position, and in due time he went on the road as a traveling salesman.

Two days afterward Marcus got a job with a furniture house. He sold chairs and tables and other furniture.

He succeeded so well in the work that he was promoted to more responsible position, and in due time he went

on the road as a traveling salesman.

When the year drew to a close—he was drawing a good salary and saving money, for what purpose he did not admit to himself. He had had one great thrill during his first year, during the year—he had never been able to find any trace of the girl who had so mysteriously appeared at his door that New Year's eve and who had fairly stung him into a renewed interest in life and had challenged the doors of wealth for money making that had been stifled by his daintiness of an art for which he had no real genius.

Mrs. Jones had disdained any knowledge of such a young lady as he described. "It couldn't be Mamie Brooks, the room over yours," she said, handing him back his coat, "Miss Brooks has got hair as red as can be, and she isn't small and graceful. She's stout and tall."

With that Marcus had to be content.

But he was not satisfied with the moment as they flew by, hoping for some word from the girl who had actually saved his life from his own destructive hand. She said she would send him at the end of the year, and he was eager to meet her—to tell her of his trials, of his constant despair and had put his shoulder to the wheel of labor and won earning success. He had dreams of his half-bred dandy.

New Year's eve found him once more in New York and again domiciled in the same room, but this time in a house, although he really had his headquarters in a more fashionable section of the city. He sat on the edge of the little bed and tried to relieve the scenes of that other night a year ago and the feelings of despair, but in vain. His heart was full of nothing but the hope of something greater might be his, for he had never ceased to think of the girl who had called him a coward.

There came a knock at his door, and it was open to reveal a messenger boy.

"Miss Danforth has asked me to fetch you to her," said the messenger. Eldredge grabbed his hat and went.

"Danforth" must be the name of his new employer.

He was scarcely prepared to be taken to a fashionable uptown street, where a trim maid admitted him to a charmingly furnished room. A slender form arose from a deep chair and came toward him. As their eyes met in the first instant, there was much relief of what a year's wait was waiting ahead to both of them.

"You have come for the revolver?" she asked wistfully as she laid her hand in his.

Marcus shrugged his shoulders and leaned for pure happiness. "Not on your life. See, when you've done for me, Miss Danforth! I owe everything to your heavenly sympathy. You've made a man out of me."

"I must explain how I happened to be there. I was on my way up to see Miss Brooks, the girl I have seen at the settlement house. I entered your door by mistake," she explained. "The Tauross club has taken the giant under its protection in the hope that it will protect and attention its life may be spared for many years."

"I'd forgive anybody tonight!" cried Marcus happily. "I thought last year was a bully one; but, Miss Danforth, I'm not going to let you go to-night and join the crowd—and help me to sober in what I feel is going to be the happiest year of my life!"

As they stood together in the shadow of old Trinity and the church the causities were one finger broken and another severely damaged.

He was a semi-circled and semi-circled body that the blood saturated a bear,

several mouth cut about and a number of shins sliced through skin pads.

"I'm a bully one; but, Miss Danforth, I'm not going to let you go to-night and join the crowd—and help me to sober in what I feel is going to be the happiest year of my life!"

"It's getting late, and I must be going. I wonder if you'd sell me that revolver! I want it for a certain purpose," she said, ignoring his confusion.

He placed the weapon in her hand without a word, but as she dropped it

A WONDERFUL BRIDGE.

Largest Natural Span in America.

The largest natural bridge in America, if not indeed in the whole world, is located in southwestern Utah, not far from the state boundary line, and is known as the George Natural Bridge. Its total length between the huge natural arches is 260 feet, and the width of the roadway is some 30 feet, while the span in the clear is 90 feet. From the bed up to the span is 190 feet. At the bottom flows a small water course that during the long hot summer months dries up, down to a mere rivulet. The water which has for some time pasted the leading scientists of the country, it could scarcely have been created by the wear of water unless there was a very large and swift current flowing in the little stream.

The existence of the bridge is of comparative recent knowledge, the first record being that the Indians who have long known that there was such a work of nature. The red men often spoke of this bridge to the early settlers of that part of Utah, but little credence was given to their stories, as they were of doubtful origin. It was first discovered by some mining prospectors. It is located in the heart of a very rugged region that is difficult of access. Of late years it has been visited by a great many tourists and sightseers, and the Indians who have made a careful examination of this bridge pronounce it perfectly safe and secure and fully capable of supporting an immense weight. The span is free from faws or seems.

STRAIGHT WALLS OF ICE.

Mighty Mount McKinley Cannot Be Climbed From the South.

Describing their expedition to Mount McKinley last summer, Professor Parker Brooks and his party say in the bulletin of the National Geographic Society that although it was the best equipped expedition from a mountaineering standpoint that has ever been organized in America, the net result of its explorations is a map of a hitherto unknown stretch of mountainous land and the knowledge that Mount McKinley is climbable only by the best equipped expedition from a mountaineering standpoint that has ever been organized in America, the net result of its explorations is a map of a hitherto unknown stretch of mountainous land and the knowledge that Mount McKinley is climbable only by the best equipped expedition from a mountaineering standpoint that has ever been organized in America, the net result of its explorations is a map of a hitherto unknown stretch of mountainous land and the knowledge that Mount McKinley is climbable only by the best equipped expedition from a mountaineering standpoint that has ever been organized in America, the net result of its explorations is a map of a hitherto unknown stretch of mountainous land and the knowledge that Mount McKinley is climbable only by the best equipped expedition from a mountaineering standpoint that has ever been organized in America, the net result of its explorations is a map of a hitherto unknown stretch of "I hear you are married, Chloe."

"Yes'm; I's married."

"Are you married, Chloe?"

"Oh, yes'm; I's happily married; Sam gets me lots of washin'!"—Yonkers Stateeman.

"If you were asked to name the handsomest man in the room, whom would you name?"

"Well," she answered, looking about, "I believe he isn't here tonight."

Tourist—"I don't see any windmills here any more."

Zoe—Zoe Sam—"We had to chop 'em down—they disturbed the aeroplanes."

How's a man doin' well?—when his opinion turns out better than yours. Some tombstone inscriptions are too good to be true.

Value of Laughter

A famous doctor once said, "Encourage your child to be merry and to laugh aloud; it helps him to expand the chest, and makes the blood bound merrily along. Command me to a hearty laugh—not to a little sniggering laugh, but to one that will sound right through the house; it will not only do your child good, but will be a benefit to all who hear, and an important means of driving the blues away from a dwelling. Merriment is very catching and spreads in a remarkable manner, few people being able to resist it." A hearty laugh is delightful harmony, indeed, it is the best of all music."

Burn Caused Open Sore

Zain-Buk Worked a Wonderful Cure.

Sometimes a bad burn, a deep cut, or some similar injury sets up a more permanent injury in the form of an open sore which seems to never heal. Zain-Buk will be found of unequalled value.

Mr. Nixon, of 901 William Ave., Winnipeg, a blacksmith at the C. F. W. shops, had his foot badly burned by some molten metal falling upon it. He says: "The burns were very bad ones, and after a few days I left an open sore, which showed marked signs of blood-poisoning. It discharged freely and caused me terrible agony, and could get no ease. At last I obtained a preparation from the doctor, which seemed to stop the discharging and made me quite hopeful, but still the wound became as bad as ever."

"I was then advised to use Zain-Buk, and from the first application the same gave me relief. The information was thoroughly checked, and the poisonous matter cleared away in a very short time after beginning with Zain-Buk. Meantime the burn and in less than two weeks the wound was thoroughly healed."

One of the main lessons of this case lies in the proper use of Zain-Buk first for any injury, sore, skin disease, or wound. It is equally good for piles, blood-poisoning, festering wounds, ulcers, sores, scalds, varicose veins, chilblains, etc. All druggists and stores sell at 50c. box or post free from Zain-Buk Co., Toronto, under no extra charge. You are warned against harmful substitutes and inferior preparations which yield a bigger margin of profit and are sometimes pushed as being "just as good." Nothing is just as good.

"I got a doctor and he helped me, but the swelling never entirely left. He said it was because my heart was weak. I then decided to try Dodd's Kidney Pills, and as I said before, they worked wonders."

Rheumatism of any kind is caused by dryness. Kidney failure is strait the curse of the race. Blood Dood's Kidney Pills cure it by curing the kidneys. They also cure the various diseases of the heart by lessening that organ's work of propelling the blood through the body.

Dodd's Kidney Pills only cure the kidney disease. They also cure heart trouble, rheumatism, and with healthy kidneys you can't have Rheumatism, Lumbar Heart Disease, Dropsey or Bright's Disease.

REMEMBER
PISO'S
for COUGHS & COLDS

Among the Freaks
"I wonder," growled the Circassian, comes to see me when he is drunk."

"Probably thinks you're a snake charmer," chorused the ossified man.

PILES CURED IN 5 TO 14 DAYS

Your druggist will refund money if PIZZO OINTMENT fails to cure any case of Itching, Blind, or Protruding Piles in 6 to 14 days. 50c.

All the things in her life a woman would like to put away with her bridal bouquet would fill a warren.

Minard's Liniment Cures Gargle In Coughs.

When a woman tells a man that he is nice looking it's a sign he believes her.

It Testifies for Itself.—Dr. Thomas' Eclectic Oil needs no testimonial except its success in cases of coughs or colds, for cuts or contusions, for sprains or burns, for pains in the head, and for rheumatism. This oil medicine proves itself and needs no general praise. This shows why this Oil is no general panacea.

No Hope for Him.

Visitor—"Don't you think it possible that a pardon may be procured for the poor man? His offence was not great, and further confinement

Would—"I'm afraid it is impossible. The crime he committed was not sufficiently atrocious to interest the public in his case."

WORKED WONDERS
IN THIS CASE

RHEUMATISM AND WEAK HEART CURED BY DODD'S KIDNEY PILLS

The Doctor helped Mrs. Stephen Roy, but there was no complete cure till she tried Dodd's Kidney Pills.

Rock Hills, Grey Co., Ont. (Specie) I am a widow. I have been taking Dodd's Kidney Pills worked wonders in my case.

says Mrs. Stephen Roy of this place. "I am free from Inflammation, Rheumatism, Neuralgia, and pain, and though I tried several remedies the results increased and was very painful. My hands and limbs were also badly swollen."

"I got a doctor and he helped me, but the swelling never entirely left. He said it was because my heart was weak. I then decided to try Dodd's Kidney Pills, and as I said before, they worked wonders."

Rheumatism of any kind is caused by dryness. Kidney failure is strait the curse of the race. Blood Dood's Kidney Pills cure it by curing the kidneys. They also cure the various diseases of the heart by lessening that organ's work of propelling the blood through the body.

Dodd's Kidney Pills only cure the kidney disease. They also cure heart trouble, rheumatism, and with healthy kidneys you can't have Rheumatism, Lumbar Heart Disease, Dropsey or Bright's Disease.

What Would Be Left?

An education authority sub-committee was examining a class in a school. One of the members understood to sharpen his scoldings by putting the following question:

"If I had a mine pie and gave two-twelfths to Harry, and should keep the rest for myself, what would there be left?"

There was a profound study among the boys, but finally one lad held up his hand as a signal that he was ready to answer.

"Well, sir, what would there be left? Speak aloud, so that all can hear," said the committee man.

"The plat!—I shouted the hopeful fellow.

He was excused from answering any more questions.

Minard's Liniment Cures Colds, etc.

Ignorance always seems to think that the knowledge which disagrees with it is just prejudice.

A bottle of Bickley's Anti-Consumptive Syrup, taken according to directions, will cure a cough in a week. This assertion can be verified by hundreds who have used it. It is a safe remedy, and a testimony to its merits so that all may know that it is a safe remedy. Send 25c. to the manufacturer, and you only 5c. to join the ranks of the many who have been benefited by its use.

"Man," said the tailor, sadly, "we read, made of dust, but I cannot see how that is so. Dust always settles. Man does so."

"Well, sir, what would there be left? Speak aloud, so that all can hear," said the committee man.

"The plat!—I shouted the hopeful fellow.

ANNUAL MEETING

Of the Blairmore Board of Trade
-Rifle Range, Town Band and Recreation Grounds Considered

THE OLD OFFICERS RE-ELECTED

A Vote on Reciprocity Was Passed—Five New Members Added—Considerable Business Transacted

The annual meeting of the Blairmore Board of Trade was held in the Union Bank building on Monday night, among those in attendance being the following officers and members:

R. W. Coulthard, president; T. B. George, secretary-treasurer; John Angus McDonald, H. E. Lyon, Louis Dutil, of the executive; D. A. Sinclair, Thos. Frayer, D. C. Drain, and J. Menard.

Minutes of previous meeting and of special meeting were read and adopted.

Several applications for membership were received and the following were duly elected, Frank Simpson, W. A. Malcolm, J. D. S. Barrett, Michel Rosse and W. J. Bartlett.

The election of officers resulted in the following: R. W. Coulthard, president (re-elected); W. A. Beebe, vice-president (re-elected); W. J. Budd, 2nd vice-president (re-elected); T. B. George, secretary-treasurer (re-elected). Executive: John Angus McDonald, J. G. Smith, H. E. Lyon, L. Dutil, D. C. Drain, Archie McLeod and Frank Simpson.

Communications from E. E. Sillicker, Halifax, re opportunities for building and real estate; G. Bailey, Calgary, vacant building for eastern firm who propose to conduct general store, and from the Regina Agricultural Exhibition committee re. exhibits, were read and ordered to lay over for unfinished business.

McDonald—Lyons, that a committee of one is appointed to ascertain if musicians are available to constitute the formation of a band. W. A. Beebe elected.

Discussion re rifle range ensued. Committee reported difficulty in locating suitable and convenient site, and matter was allowed to lay over till a later date.

The matter of recreation grounds was taken up and considerably discussed. On motion by J. A. McDonald, seconded by D. A. Sinclair, matter was allowed to lay over.

Communications were again taken up and that of E. E. Sillicker was again read. On motion the secretary was requested to inform that there are now four real estate and building firms doing business here.

Secretary was authorized to forward G. Bailey the necessary information.

Communication from Regina Agricultural Exhibition committee was ordered referred to the different manufacturers, including the West Canadian Collieries, McLaren's Mill, Blairmore Brick Company, Rocky Mountain Cement and Lime Companies, and the secretary was asked to inform the R. A. E. secretary of their action.

A committee was appointed to in the meantime make the necessary recommendations of changes to the by laws and constitution and to refer same to the special meeting on Friday night.

Auditors R. W. Coulthard

and T. B. George, were ap-

pointed to examine the books

and accounts of the Board and to report at the next meeting.

Meeting closed at 11.45.

Building at Frank

Frayer & Sinclair are erecting a two-story building at Frank for A. Bonameco. This building is being erected on lots 1 and 2 in block 24. The down stairs will be used as a store while the upstairs will be made into a hall.

Work Resumed

Work was resumed on the Blairmore water works on Monday when contractor E. Morino put a large gang of men at work laying pipes under the bed of the Old Man river. Mr. Morino is taking advantage of the low water which is at present in the river, and he expects to have this work completed before the river rises.

Rocky Mountain

Sanatorium

We understand that the Canadian Coal Consolidated, Limited, will name their new sanatorium which has recently been erected at Frank and which has just been opened, the "Rocky Mountain Sanatorium." Already many inquiries have been received concerning this magnificent institution and numbers have signified their intention of visiting this sanatorium in the near future.

came up for discussion. Mr. Lyon explained the great need of same, particularly at the railway station. Secretary was authorized to communicate with Deputy Postmaster General and Inspector of Railways Mail Service on the matter.

Board was informed that W. J. Budd would offer his new hall as a meeting place for the Board at rental of 87 per meeting. On motion matter was allowed to lay over for a later date.

McDonald—Beebe Resolved that we—the Blairmore Board of Trade—endorse the Reciprocity Bill now before the Canadian Parliament, as we consider it of advantage to Canada.

Considerable discussion ensued regarding the legitimacy of the present night of meeting and the purpose stated on members notifications for which this meeting was to convene. The president ruled that a special meeting be called for Friday night, the 17th, for the purpose of considering the constitution and by laws, making any necessary amendments thereto, and to ratify the minutes of the present meeting.

H. E. Lyon moved an amendment to the former motion to effect that discussion on reciprocity be laid over till next meeting. Motion was not sustained.

Original motion was put and carried by a good majority.

Lyon—Beebe, that a meeting be called for Friday night at 8 o'clock, for the purpose of discussing amendments to constitution and legitimatising as to the regularity of meetings. Carried.

A committee was appointed to in the meantime make the necessary recommendations of changes to the by laws and constitution and to refer same to the special meeting on Friday night.

Auditors R. W. Coulthard and T. B. George, were ap-

pointed to examine the books

and accounts of the Board and to report at the next meeting.

Meeting closed at 11.45.

ROLLER RINK AT BLAIRMORE

Mercantile Hall Converted into a

Splendid Rink—Was Opened on Monday Morning

H. E. LYON IS THE OWNER

A Good Addition to Blairmore's Many and Worthy Pastimes—Much Interest Manifested

Come to Blairmore and enjoy yourselves all you who love roller skating.

Another source of entertainment and amusement has been introduced in Blairmore in the shape of a roller skating rink, and it is already the talk of the town, so much so that it has completely put Mr. Theabaud's speech into oblivion.

Roller skates were used in Blairmore for the first time on Tuesday morning when a number of experienced skaters and several others who were anxious to learn, donned the rollers and whirled around on the floor in the Mercantile hall.

The first exhibition was a good one and was successful in learning several venturesome persons, besides creating a craze which we feel will long be maintained.

The roller skating has been introduced in Blairmore by H. E. Lyon. He has turned the Mercantile hall into a roller rink and has engaged Mr. A. Murdy as manager. Mr. Murdy has roller skating down to a science and will be pleased to teach all those who desire to learn. So far as we can learn, wherever roller skating has been introduced it has been well patronized. It is a splendid exercise and those who attend are always physically improved.

We welcome this new pastime to Blairmore and hope that it will long continue to be an attraction to those who desire good, pure and wholesome exercise. We understand that the rink will be opened every afternoon and evening. The admission price is in the reach of all.

Presentation of Frayer Cup

On Saturday night a performance of more than usual interest took place at the opera house, Coleman, a prominent feature of which was the presentation of the Frayer cup to the winners of the Crow's Nest Pass hockey team—Coleman's team. The affair took place during an intermission of the moving picture programme put on by the Clark company, which was throughout the best line of pictures and the best musical programme of the season.

Mayor Cameron rose to the platform, and in his usual able manner introduced the president of the Pass League, Mr. H. E. Lyon, to whose lot fell the important duties of making the presentation. The Mayor spoke in glowing terms of the growing interest in hockey manifested during the past season, and of the keen, true-sportmanlike spirit of the boys of the Coleman club. He also referred to the interest shown towards the association by his friend, Thomas Frayer, of Blairmore, who had so kindly awarded a beautiful silver cup as a trophy to the club. This cup has added no small amount of interest in the games of the past season, and the Coleman boys, as on several former occasions had been successful in consequence of which the Frayer

cup was to adorn a place in Coleman until next season.

The Mayor now introduced the president of the association, Mr. Lyon, who in a fitting manner made the presentation through the manager of the Coleman Hockey Club—Perry Williamson. Mr. Lyon also referred to the true athletic spirit displayed by the different teams during the season, and while he could not say much of the success of the Blairmore team, he felt safe in saying that a true spirit of friendliness and good will prevailed throughout the entire season's programmes. He had pleasure in making the presentation of this beautiful "cup" and in complimenting the winners upon their series of successes, expressed the hope that such fortune would continue to follow them and that yet another season they would succeed in waving the winning "stick" of the Pass.

Mr. Williamson, on behalf of the Coleman hockey club, very briefly thanked the president for the cup, and expressed his appreciation of the attention given to the game by the Coleman boys during the season 1910-11. He hoped that it would be the good fortune of the club to retain the new cup for yet another and another season. He felt that the lads of the club were much under a compulsion to their success by their friend, Mr. Frayer, for his having kindly presented them with this beautiful trophy. In closing his remarks he moved a hearty note of thanks to Mr. Frayer, whose name adorns the ornate trophy, whose favor will ever remain in the hearts of the participants in the Crow's Nest Pass. Not followed three cheers for Thomas Frayer, three cheers for the Coleman Hockey Club, and three cheers for the chairman, to all of which the audience heartily responded.
